Safety quiz

Look at the 6 pictures

Each picture shows a dangerous situation involving electricity.

Your job is to:

Write the number of the matching safety rule in the box above each picture.

6 important safety rules:

- 1. Stay away from electricity substations—they are very dangerous!
- 2. Never mix electricity and water-it can hurt you.
- 3. Learn what to do in an electrical emergency.
- 4. Be careful when playing near power poles and wires.
- 5. If you see something unsafe, tell an adult right away.
- 6. Metal is a conductor of electricity and can be dangerous!
