

# Action plan checklist

Make a plan for when the power goes out.  
Use the checklist below to help you prepare.

## Getting started

- Have you registered as a life support customer and are your details up to date?
- Do the current COVID-19 protocols impact your plan?

## Know your equipment

In a power outage does your equipment need:

- a regularly charged backup battery?
- a surge protector to protect it when the power comes back on?
- an uninterruptible power supply (UPS) for temporary battery backup power?
- reserve oxygen cylinders, and are they filled and working?

## During a power outage

- Do you have a phone that will work when the power is out?
- Could you ask a neighbour to check on you during a power outage?
- Keep Ausgrid's emergency number **13 13 88** handy and check [www.ausgrid.com.au/poweroutages](http://www.ausgrid.com.au/poweroutages) for updates.
- Have you discussed emergency arrangements with your medical practitioner/carer during outages?

## If you need to travel

- Do you know how to transport your medical equipment if necessary?
- Do you have emergency contact details handy e.g. doctor, hospital, neighbour or local taxi service?
- Does your hospital have backup generators that could supply your life support equipment?
